CLAUDE CERTIFIED ASSOCIATES

AI TRAINING & ENABLEMENT · CURRICULUM

Three steps to getting AI working for you.

A self-paced program that takes your team from using AI now and then to having it do real work for them, taught on your own tasks.

3 main topics | Self-paced | Works with Claude, ChatGPT, Copilot & Gemini

HOW IT WORKS

1 MODULES 1–8

The essential skills

Use AI properly: give it clear instructions, check its work, connect it to your email, calendar and files, and set it up so it already knows your business.

2 MODULES 9–16

Automation

Hand over the jobs you repeat every week. Turn them into skills AI runs on demand, then put them on a schedule.

3 MODULES 17–24

AI agents

Let AI handle whole jobs. Plan an agent, build it, launch it, then add more and put a lead agent in charge.

WHAT'S INCLUDED

3	**2 hrs**	**∞**	**∞**
main topics, done at your own pace	of one-on-one support every month	lifetime access to the learning academy	lifetime access to our community

Every module is built around **your real work**, not demo examples, so what you learn is in use straight away. The full list is **over the page**.

We'll walk you through it on a call.

THE FULL CURRICULUM

Everything you'll learn, step by step.

Short, hands-on modules. Each one ends with something you can use in your work the same day.

1 The essential skills

MODULES 1–8

1 AI Basics and Safe Use

Learn what AI is, how it works, and the rules for using it safely.

2 Giving AI the Right Background

Learn how to load context and run reusable mini-workflows for your weekly tasks.

3 Better Prompts, Fewer Mistakes

Get Claude to write your best prompts, and catch AI mistakes before you trust them.

4 Memory & Context

Build memory and context so your work gets better every time you use it.

5 Connecting AI to Your Email and Files

Link Gmail, Calendar and Drive to Claude, and watch it act inside them.

6 Plan Your First AI Workflow

Find the connectors built for your role, then map your first real workflow.

7 Build Your First Workflow

Turn your plan into a working, multi-step AI workflow for a real task.

8 Make It Reliable

Test your workflow so it gets the same good result every single time.

2 Automation

MODULES 9–16

9 Ready-Made AI Skills

Find, install and run ready-made skills instead of writing prompts from scratch.

10 Build Your Own Skills

Turn a task you repeat into a skill Claude can run on demand.

11 Your AI Toolkit

Choose the right extra AI tools for your role and connect them to Claude.

12 How Automation Works

Learn the line between AI helping you and work running on its own.

13 Your First Hands-Free Job

Hand Claude Cowork a real job, walk away, and come back to it finished.

14 Hand Over Bigger Jobs

Brief the outcome, not the steps, and let Cowork handle your inbox for you.

15 Put Your Jobs on a Schedule

Put a whole week of jobs on a schedule that runs without you.

16 AI in Your Browser, Safely

Get Claude working your browser safely, then lock in the toolkit you've built.

3 AI agents

MODULES 17–24

17 Do You Need an Agent?

Learn what an AI agent really is, and whether your task justifies one.

18 Plan Your Agent

Design your agent in full — its goal, tools, rules and reports.

19 Get Set Up to Build

Get your accounts, tools and keys ready before you start building.

20 Build and Launch Your Agent

Connect your tools, build the agent, test it, then set it live.

21 Make Your Agent Better

Review your agent's work like a manager, then upgrade it with evidence.

22 Make It Safe, Then Build Another

Make your first agent safe to leave alone, then build a second.

23 Build a Team of Agents

Add a third agent, then hand the managing to a lead agent.

24 Run It All and Measure the Results

Tidy your agents into one operation and build a dashboard to prove it.
