AD ON AI

CERTIFIED CLAUDE EXPERTS

// AI INTERMEDIATE

Learn to use AI like a pro, in a fraction of the time.

A self-paced program that takes you from your first message to Claude doing real jobs on a schedule without you. Taught on your own tasks, for people who don't have time to spare.

PROGRAM FEE

$500

per person · once-off · ex GST

- All 6 modules & platform access
- Hands-on lessons, taught on your own tasks
- Lifetime academy access*

+

MEMBERSHIP

$100/mo

per person · ex GST · support & community

- 1 hour of one-on-one support every month
- Community: masterclasses, podcasts, a newsletter and a peer network

Taught in Claude · Cowork · Claude in Chrome · Excel, Word & PowerPoint

The full journey, without the long runway

WHAT YOU GET

Not another course you never get to.

You take a job you do by hand and teach AI to do it. Those jobs don't come back.

Built for people short on time
Six short, self-paced modules. Do one when you have a spare hour.

Straight to what's useful
From your first message to jobs running on a schedule. You build each thing once, so you cover the ground fast.

Taught on your real work
Every lesson uses the tasks you already do, so what you build is in use the same day.

Help whenever you need it
Add a membership for the community, and one-on-one support when you get stuck.

THE JOURNEY

Three steps to getting AI working for you.

STEP 1

Get started
Modules 1–2

Find your way around Claude and set it up so it knows you. Then learn to get good answers, and fix the ones that aren't.

STEP 2

Plug it in
Modules 3–4

Connect Claude to the tools you already use, build a workflow that does a real job, then turn it into a skill.

STEP 3

Hand it over
Modules 5–6

Make pages, designs and charts, try other AI tools, then hand Claude whole jobs and put them on a schedule.

YOUR MEMBERSHIP

What your $100 a month gets you.

Support isn't part of the program fee. It comes with your membership, along with everything in the community.

MONTHLY

One-on-one support
An hour with our AI specialists each month, for your questions and the trickier workflows.

PER TOOL

Tool masterclasses
Focused sessions on each new tool worth your time, built around real business use. Recorded and kept in the academy.

WEEKLY

Business podcasts
Short, practical episodes on how real businesses are putting AI to work.

MONTHLY

The newsletter
A round-up of what changed and what's worth your attention, in plain English.

ALWAYS ON

A peer network
Other people from Australian businesses who use AI heavily in their own work. Compare notes and swap what works.

WHAT YOU BUILD

What you walk away with.

One of everything, built around the work you're already doing.

- 1× Claude set up to know you
- 1× Workspace for your repeat work
- 1× Workflow on your own tools
- 1× A Claude skill
- 1× Your own Cowork task
- ✓ The knowledge to do all of them by yourself

+ Plus the pages, designs, charts and documents you make along the way, and optional AI video, voice and images.

FAQS

The questions we hear most.

How is this different from AI Enablement?
It's shorter, and focused on getting Claude working for you day to day. You build each thing once. AI Enablement builds each one three times over, then goes on to AI agents.

What do I need to take part?
A paid Claude plan. The other AI tools in Module 5 are optional and paid for separately.

Can I cancel?
Yes, you can cancel your membership any time. That ends your support, community and academy access, and a re-joining fee applies if you come back later.

Can I transfer my membership?
No. It includes lifetime access to the Ad On AI Academy*, so it can't be transferred.

How do I book my one-on-one support?
It comes with your membership. Book through the calendar link in your platform, in sessions of at least 1 hour.

Do unused support hours roll over?
No. The hour is use-it-or-lose-it each month. If you need more, extra support is $300 per hour, ex GST.

Is the platform secure?
Yes, all features and content are hosted securely.

When do my entitlements begin?
From the day you start your course.
